

Environmental Policy

Grindley Construction was established in 1988 and has built a reputation based on our core value of Commitment. Commitment to be an environmentally and socially responsible organisation while meeting the needs of our clients without hindering future generations.

To achieve this, we will:

- Demonstrate leadership at all levels of the organisation, committed to sustainability
- Maintain a management system that allows for the protection of the environment including the prevention of pollution
- Incorporate into the management system legislative, regulative, and any other requirements to which we subscribe that relate to environment to ensure minimum compliance
- Set measurable objectives at relevant functions and levels of the organisation
- Plan and implement procedures to achieve objectives
- Monitor performance
- Maintain and continually improve our management system
- Provide education and training to facilitate knowledge and experience
- Allocation of appropriate resources to achieve our objectives
- Continually strive to achieve greater environmental sustainability where our activities preserve natural resources for future generations

We acknowledge that the organisation operates in an environment where we have a responsibility to all and are committed to continual improvement of sustainability and prevention of pollution.

Our policy documents how we will achieve our commitment to being environmentally and socially responsible. It governs how we manage the environmental impacts of our activities and it will be communicated to all those applicable in our operations. The policy will be reviewed regularly to maintain relevance and appropriateness to our organisation's objectives.
